JORGE AMILKAR BOLIVAR MORA

Desarrollador Full Stack | DevOps | Analista de Datos

Cucuta, Colombia | +57 312 337 4341 | amilkarbolivar5@gmail.com | github.com/amilkarbolivar

PROFESSIONAL PROFILE

Systems Engineering student with strong software development skills, specializing in Java, Spring Boot, React, Node.js, PostgreSQL, Python, Docker, AWS, RESTful APIs, and agile methodologies. Experienced in building and deploying full-stack applications with CI/CD pipelines, containerization, and cloud infrastructure. Passionate about efficient problem-solving, continuous improvement, and data-driven decision making. Currently seeking opportunities to apply my skills in a dynamic professional environment.

KEY COMPETENCIES

Full-Stack Development (React, Node.js, Spring Boot) | DevOps & CI/CD (Docker, GitHub Actions, AWS) | RESTful APIs | SQL & NoSQL Databases | Data Analysis (Power BI, Python, SQL) | Agile Methodologies | Git/GitHub | Containerization | Cloud Deployment | Problem Solving

PROFESSIONAL EXPERIENCE

Full-Stack Developer - Vikos Store

Freelance | Enero 2025 - Presente

Full-stack developer with experience in developing and maintaining an e-commerce platform (Vikos Store) using React, Node.js, PostgreSQL, Docker, and AWS. Specialize in participating in complete projects from planning to delivery applying Scrum methodology, designing scalable relational databases, and developing robust RESTful APIs. Focus on integrating backend systems with modern user interfaces to deliver seamless shopping experiences. Committed to delivering high-quality technology solutions tailored to specific business needs.

- Developed product catalog, shopping cart, and order management features.

- Imp

Full-Stack Developer - UniMental (Salud Mental Universitaria)

Freelance | 2025

Developed a full-stack web platform for university mental health support using React, Vite, Node.js, Express, and PostgreSQL. Implemented forums, health directory, informative articles, and assessment questionnaires. Deployed with Docker Compose on AWS EC2 with Caddy reverse proxy and Let's Encrypt HTTPS.

Backend Developer - Sistema de Inventario Multitenant

Freelance | 2025

Developed a multi-tenant inventory management system using Java, Spring Boot, Spring Data JPA, and MySQL. Designed RESTful APIs with JWT security, implemented product, inventory, user, and transaction management. Containerized with Docker and deployed on AWS.

PROJECTS

Vikos Store

React - Node.js - PostgreSQL - Docker - AWS - RESTful API - GitHub

E-commerce platform with product catalog, shopping cart, and order management. Deployed on AWS with HTTPS. Repository: https://github.com/amilkarbolivar/Vikos_store | Live: https://vikosstore.duckdns.org/

UniMental

React - Node.js - PostgreSQL - Docker - AWS - RESTful API - GitHub

University mental health platform with forums, health directory, and articles. Deployed on AWS with HTTPS. Repository: https://github.com/amilkarbolivar/web_salud.universitaria | Live: https://saluduniversitaria.duckdns.org

Sistema de Inventario Multitenant

Java - Spring Boot - MySQL - Docker - AWS - RESTful API - GitHub
Multi-tenant inventory management system with JWT security. Repository: https://github.com/amilkarbolivar/Inventario

Portafolio Profesional

React - Vite - Tailwind CSS - Docker - AWS - GitHub
Modern portfolio with 3D animations, projects section, certifications, and contact form. Live: https://portafolioamilkar.duckdns.org

EDUCATION & CERTIFICATIONS

Bachelor's Degree in Systems Engineering

University of Pamplona - Expected graduation: 2027

Certifications

- Despliegue de Aplicaciones y Servicios en Contenedores Docker - SENA (48h, Oct 2026)

- Apl

- Problem-Solving - Strong analytical thinking for resolving complex technical challenges

- Tea
